

# IRRIGATION ENGINEERING SOLUTIONS

## IRRIGATION DESIGN

Drip Irrigation design.

Maximum accuracy in design including mapping and analysis of multiple alternatives according to customer requests.

3D modeling for every detail and accurate BOM that generates significant saving on project costs.

## 3D MODELING

3D Modeling for Piping Systems.

We use and design 3D models to understand where there are conflicts and necessary adjustments before installation.

3D models are accurate and ensure that solutions worldwide adhere to local regulation.

## WHY CHOOSE US

- Complete design service
- Variety of solutions to suit budget & time-frame
- Dry assembly check before shipping and installation
- Mapping and terrain analysis using GIS
- Accurate BOM
